

OPCUG / WACUG Joint Meeting  
December 10<sup>th</sup>, 2011  
PC Clinic

Were our helper geeks able to resolve your problems?

“Yes. A great help! There was some corruption in my Microsoft Outlook pst files and they found an internal file that helps to fix it. Thanks a lot!”

“Thank you for following up on my problem. Yes, the computer geek was able to help me. Of course, the message about the drivers said all was okay, not the usual message I have been getting about the drivers being outdated. Anyways, he did install the driver for my printer, installed the driver for the sound (which I had forgotten I needed and remembered while there), and also updated my modem which he said was outdated. All in all I am very happy. ”

“Yes, they were great. I'm pleased that my computer is running much better now and I learned a few tricks on the Windows 2017 operating system. The PC clinic is a great service. Thanks again.”

“So far, after updating the bios on the computer, it started up this afternoon without a problem. Hopefully, it now is okay.”
